

FOR IMMEDIATE RELEASE

Digital Watchdog® DW Spectrum™ IPVMS Now Integrated with RS2® Access Control

DW Spectrum™ IPVMS on Multiple Devices

Cerritos, CA (September 21, 2016) – [Digital Watchdog](#) (DWTM), the industry leader in digital recorders, surveillance cameras and related management software, is proud to announce the integration of RS2® access control system with our DW Spectrum™ IPVMS.

This integration was driven by the opportunity at hand, a fast growing school district's desire to see DW Spectrum™ IPVMS combined with a Mercury based access control solution. This prompted the development teams at Digital Watchdog and RS2 to put on their overalls and deliver a best in breed solution.

"We are very excited to bring the team at RS2 into the DW integration partner program," said Patrick Kelly Director of IP Sales at Digital Watchdog. "This integration is further evidence of DW Spectrum's open architecture and the easy path to integration. The addition of RS2 continues to open the world of possibilities for DW Spectrum users and we look forward to operating in this expanded universe."
